White Gold (Ormus)

**Shopping****AQUACENSION®**

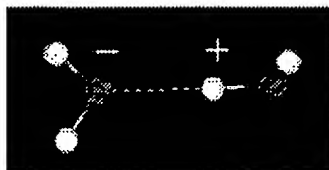

Aquacension looks for feared free radicals with desire; and neutralizes combining with them to form pure oxygen.

**BIO-OXIDIZER THERAPY**

It increases oxygen levels at cellular level.	It quickly eliminates infectious bacterias, virus, mushrooms and parasites without damaging beneficial body microorganisms.
It increases the available energy levels.	It amplifies the effect of the vitamins, minerals, amino acids, albumins and other essential nutrients, already come from the feeding or dietary complements.
It strengthens the inmunitary system .	It contributes oxygen to the body which needs for the oxidation and elimination of toxins, cellular waste and excesses of fatty.
Express concentration increase.	It promotes recoveries until 50%quicker in lesions, stress or extreme exercises. (It is very popular their use between elite sportsmen and trainers)
It calms down it is altered nervous system.	It is very advisable in the treatment of breathing problems, allergies, asthma, sinusitis and infections of breathing roads.

About the Pleyades work's from **Barbara Marciniak** (Bringers of the Dawn) and also other authors, often **speaks about the importance of take additional oxygen, to codify the news DNA filaments, and accelerate Ascension process.** The cells cannot be saturated only breathing, although it is deep; since the oxygen presence in the atmosphere has gone down among 19% to 35%; what represents a reduction of 45 oxygen% in the atmosphere. There are products of stabilized oxygen that liberate oxygen in form of (O2) when arriving to the digestive tract, but they don't get the wanted effect. Aquacension doesn't liberate (O2) the same as other products, but nascent oxygen: (O1). The nascent oxygen stabilized " looks for with desire" and it

neutralizes the dangerous free radicals, combining with them to form pure oxygen:

(Or-1) Nascent Oxygen Aquacension + (O+1) free radical ion = (O2) Oxygen

This is the reaction that takes place with Aquacensión. The products that liberate the oxygen like (O2), they are not good to displace and to destroy the free radicals, since they cannot neutralize them. **The free radicals, considered by some biochemical, as the main cause of the degenerative illnesses, are ions of simple oxygen (monoatomic) loaded positively (O+1). The nascent oxygen is loaded negatively (O-1), attracting with its opposed load to the ions of the free radicals and neutralizing them; producing a simple molecule of pure oxygen (O2).** The nascent oxygen of Aquacension, also stimulates peroxidases enzymes that strengthen the immune system, which play an important paper in the elimination of the radicals free to increasing the cellular oxidation. The **Dr. Otto Warburg**, possessor of a Nobel Prize, spoke of the cellular oxidation in 1996 in his work: **"The main cause and prevention of the cancer."** He defend that the main cause of the cancer is the substitution of the breathing normal oxygen for the cells, by a fermentation of sugar. All the cells usually extract the necessary energy for their breathing oxygen; while the cancerigenic cells extract it in a large part of the fermentation. Therefore, the healthy cells are aeróbic (to be developed they need a half rich one in oxygen), while the cancerigenic cells are partially anaeróbic (they grow in oxygen absence). In fact, many harmful microbes are also anaerobic, they grow in a completely lacking oxygen atmosphere. The stabilized nascent oxygen is without a doubt a **powerful antiviral agent**, acting against harmful bacterias, parasites and mushrooms (as the Candida Albicans), without damaging the beneficent aerobic bacteria so necessary for our well-being. Oxygen is also very important to the correct operation of the brain; since it needs around 25% of oxygen molecules. In a poor half in oxygen, the brain becomes apathetic and insensitive. The nascent oxygen of Aquacensión, **enhances the cognitive function and the cerebral resistance**, nurturing the brain and maintaining it full with youth. The adenosine triphosphate or ATP, are especially a nucleotid that is good as main energy agent for many biochemical reactions in the body, those associated to the muscular activity and the replicación of the cellular components. The oxygen is vital in the production of ATP, when more oxygen prepares our cells, more quantity of energy will be able to take place and at the same time we get bigger replication of the cellular components. The energy extracte of the nascent oxygen of Aquacension, allows us to stay **high energy levels**. The peroxide of hydrogen and other products of stabilized oxygen; they react immediately to the contact with the stomach acids, they liberate oxygen too quickly. Aquacension is formulated to remove nascent oxygen slowly along the digestive tract, allowing a better absorption at cellular level. All the benefits of the nascent oxygen, are increased with the addition of Chrysalis 8. The glasses molecularly nano-structured, they diminish the tension of the water surface and amplify the estates wetters of the water. When combining the two products (Chrysalis 8 and Aquacension) it is gotten a great increase of the cellular transport of nascent oxygen and a bigger assimilation through the cellular membranes. Aquacension Composition (60ml.): Distilled water, free oxygen molecularly connected with electrolytes. Use recommendation: Adults of 8-15 drops in a glass of water, 2 or 3 times to day.

Aquacension ® and the Bio-oxidizer Therapy

INTRODUCTION

The prefix "BIO" refers properly to the biological term that means life, or I live. The term Oxidizer makes most of people think in oxygen. When they are used together, one would understand "I Life-oxygen." However, it is not this way. The oxidation, is not the same thing that the oxygenation; properly this, the term oxidation means, the absorption or cleaning of an electron of any molecule that has an available electron. On the other hand the term oxygenation is used when the number of oxygen molecules is increased in a mixture. Oxygen can cause the oxidation, and if oxygen molecules increased, it would be denominated oxygenation. Peroxide of hydrogen is made in a natural way into the human body, which maintains during a lifetime its levels without change. It is part of a system that helps the body to regulate the membranes of alive cells; it is a hormonal regulator, necessary in the production of Estrogens, Progesterone and Tiroxine, it is essential to regulate the levels of sugar in the blood, as well in the production of Energy on all the cells of the body. It helps to regulate some chemical elements that operate in the brain and nervous system. It has a stimulative and regulator effect on the immunologic system and it can eliminate direct or indirectly virus, bacteria, parasites, fermentations, fungi and other varieties of harmful organisms. However the production of this important element in the human organism can suffer alterations for an infinity of environmental as infectious and nervous causes. **The studies demonstrate, the metabolic positive effect when giving in an oral way a rich stabilized oxygen solution. It is the case of "Aquacension ®", which has the capacity to oxidize almost any pathological substance besides producing an increment of the Cellular Oxygen into tissue, that which has demonstrated to have an high therapeutic value, adding a new page in the medicine modern history.** Bio-oxidizers Therapies have been used during almost 100 last years. They appeared in the main magazines doctors in 1920. Since they have been studied, in many important investigation centers from all the world, including a nomination for prize Nobel in the year of 1993, to a North American investigator (Charles H. Farr). **Oxygen is used to circulatory problems, lung illnesses, parasit infections and uneasiness related with the Immunologic system. It must standing out that secondary effects is not presented.** Recently, the government from the United States (by means of the alternative medicine office and diverse national institutes for the health) has become more receptive to the idea of the use oxygen in different therapies. It is expected that they begin to present human tests with as additional clinical fact. (Regarding especially the complete remission of the AIDS symptoms and the AIDS test in patients with positive HIV) What are bio-oxidizers therapies? Oxygen is essential for life and the most abundant element in the atmosphere, it constitutes around 52% of the terrestrial mass and 65% of human body elements. It is a clear and odourless gas, with easy water solubility. Each molecule is composed by two atoms (O₂). Oxygen is related with all the corporal functions and we need it to survive. A normal person uses per minute 200 milliliters Oxygen while it rests near 8 liters during the activity. The brain uses a 20% of the total quantity of Oxygen that body consumes. Oxygen reacts with the sugar that we eat, as well in

the decomposition of the food fats forming Carbon Dioxide, water and energy, which is stored in a component called ATP, this last one is the main source Energy for the cells. We conclude this way that Oxygen makes the energy that we need to survive and develop us. **Oxygen it is absolutely necessary for the cells health and it works in opposition into to the body toxins.** Most of pathogen elements are anaerobes, the cancerigenic cells are even identified inside this classification. In 1966 the winner of the Medicine prize Nobel (Dr. Warburg) it confirmed that development cancer key is the oxygen lack at cellular level. Main causes of Oxygen Deficiencies: · Polluted air · Weak Foods (tinned food and chemical additive) · Bad breathing Bio-oxidizers Therapies, refer to the increment of the oxygen molecules of in the body, increasing this way the oxidation capacity and diminishing the tendency to diverse illnesses. How are the therapies bio oxidizers used -? In the Bio-oxidizers therapies, are used small quantities of "Aquacension ®" (1 drop x each 5 Kg of weight) added to a water base, so they flow inside the body, given oral via, once inside the organism, oxygen is liberated by gastric acids action and it is absorbed through the walls from the stomach to the sanguine torrent, which takes charge of distributing it to all the cells of the body. Likewise this oxygen becomes direct or indirectly harmful for virus, bacterias, fungi, sick cells or faulty tissues, through a process of oxidation, all of this are eliminated of the body, that's the cause we can classify "Aquacension ®", as a cleanser.

Next some of Illnesses that have been treat with an high percentage of success with Oxygen therapies and which registrations are had in the International Foundation of the Bio-oxidizer Medicine: · Heart Illnesses and sanguine system. · Lung illnesses · Infectious illnesses (Herpes, HIV, Parasites) · Immunologic System Disorders (Diabetes, Sclerosis, Arthritis) · Alzheimer · Cancer · Migraine · Carcinoma pain · Parkinson etc. Which benefits Bio-oxidizers Therapies have through the "Nascent Oxygen" use? 1. - It stimulates the production of White Globules (body natural defenses) 2. - It works as Virucida 3. - It increases the Oxygenation at cellular level 4. - It inhibits the tumors growth 5. - It oxidizes and degrades the petrochemical matters 6. - It increases the elasticity of Red Cells membranes 7. - It increases the interferon production and the factor of Tumors Necrosis 8. - It increases the anti-rust Enzymatic system, which picks up the excess of free radicals 9. - It accelerates the cycle of the citric acid, main factor in the energy liberation coming from the sugar 10. - It increases the tissue Oxygenation in, helping to the patient's improvement. Unfortunately one of the most important reasons in the lack of information and little use of this type of therapies, are that oxygen it is a non patentable substance, since it is cheaper in all their application forms, reason why it doesn't represent big financial incentives to the Medical practice incorporation. NASCENT OXYGEN Nascent Oxygen has been applied during many years, as a oxygen generator that is activated in the stomach, when being ingested of who for oral via, and when it met in contact with a sour solution (Gastric Juices) it removes their three molecules in the stomach converting the oxygen in it natural state as a gas, going by the walls of the stomach. It is caught into the red cells and flowing by sanguine torrent, providing to body from 20 to 25% more oxygen and helping it in a better cellular nutrition.

CHARACTERISTIC

Aquacension ® is a cleaner solution of wide spectrum, highly loaded with oxygen; which has been stabilized with molecular sodium, chlorine and Oxygen, than they being ingested and to fall in the stomach they break, combining the chlorine and the sodium in small quantities that are eliminated quickly, remaining the Oxygen, which is absorbed through the walls from the stomach to the sanguine torrent and also, to the cells that compose this plasm, which take charge of irrigating all our organism providing all the cells and organs with a 20% more of oxygen. It represents countless benefits for the metabolism; mainly to the circulatory apparatus and the nervous system, giving a maximum work yield.

NASCENT OXYGEN, IN ILLNESSES TREATMENT

Due to its high concentrations of oxygen and alkalinity; the Nascent Oxygen of Aquacension ®, works in the organism like a natural germicide. According to the tests doing in some noted laboratories, the great majority of virus and bacterias that work in the most common children and adults illnesses of our communities, they present sensibility to the this product. This, joined to the benefits before mentioned, make to Nascent Oxygen, a very complete natural product for prevention and combat of countless illnesses.

SPECIFICATIONS: Chemically Aquacension ®, is a stabilized solution of Chlorine, Sodium and Oxygen molecules, forming a chemical liquid compound approximately of 1.5 density, colorless, with chlorine slight scent and PH 11.4 - 11.6. This compound doesn't have toxicity grade neither lethal dose, since quantities so high of concentrated product should be ingested that leaves outside any possibility of accident . It handling is easy and sure, being totally soluble in water. Their action is inhibited by the temperature and the direct light, for what is recommended to maintain this product in a fresh, dry and dark place.

USES AND APPLICATIONS

Nascent Oxygen from Aquacension has been used in countless treatments, and it reinforces the effect with therapies of alternative medicine treatments. Next are listed some of illness success tried with oxygen when is including in the treatments:

Arteriosclerosis	Amibiasis	Gastritis
Syndrome of Dawn	Cisticercosis	Colitis
Alzheimer	Tromboflebitis	Migraine
Mental delay	Diabetes	Hepatitis
Senile insanity	Cancer	Illnesses of the skin
Lupus Eritomatoso	Cancer	Illnesses vírales

Also, we remember that you can use it in preventive measure, representing a valuable reinforcement for most of the functional disorders of our organism and favoring the children development and their good formation.

GENERAL CHARACTERISTICS:

Identification: Name: Aquacension ® Chemical family: Source of Stabilized Oxygen Formula: Patented mixture, the precise composition of this product stays as an industrial secret.

Physical data:

Point of boil (760 mm Hg) _____ 110o c.

Freezing point _____ -10o c.

Point of Decomposition _____ 170o c.

PH. _____ 11.4 –11.6

Density _____ 1.5–1.6

Solution in water. _____ 100%

Scent and Appearance _____ Chlorine, Without Color, Soft Scent

Data about dangers:

The direct contact with the eyes can cause irritation. Rinse with water current for space of 10 minutes. .

Aquacension ® 60 ml.: Nascent oxygen molecularly bonded with mineral electrolytes and distilled water. Use recommendations: Dilute to 12 since 15 drops in a glass of mineral water. Take 3 glasses to day. It can also mix with infusions and natural juices.

Oxyclear ® 100 grs.: Oxygen Nascent bonded with calcium and magnesium Use recommendations: Mix half spoonful between glass of water and drink it. Next , take a natural juice of lemon (you can dilute with water) or any other citric fruit (orange with lemon, pineapple, grapefruit). Not sweeten with anything. Take it always in fast and allow to pass 1 hour until the next food. **Note:** The information here offered doesn't seek to substitute any medication, medical treatments, or cure any illness. In event of serious illnesses, consult with a specialist.
